18 grains

SOLD SEPARATELY

8-32 Multi Point
(100, & 125 grains)

The T64 FMJ shaft profile features a 6mm point-end then seamlessly tapers down to a micro 4mm diameter at the nock end. This unique profile provides an integrated front-of-center (FOC) weight distribution that ensures more accurate arrow flight. The 4MM nock end greatly reduces friction in flight and through the target to maximize penetration.

LONG RANGE**

**CUT YOUR NEXT
LONG SHOT
DOWN TO SIZE.**

4MM AXIS LONG RANGE™

A lighter weight micro 4mm diameter gives you more speed and reduces friction to add more broadhead penetration. Includes Easton 4mm nocks and 8-32 half-outs to add accuracy and F.O.C. Made with light weight Acu-carbon for a higher ballistic coefficient and more velocity. Sizes 250, 300, 340, and 400 in both standard and ultra-precise Match-Grade models. Made in USA

Make your shot one to remember—get AXIS Long Range today.

BEGINNER ARCHERY

ARCHERY COMBO PACK

- High quality 600D fabric hip quiver
- Holds up to 12 arrows
- Integrated belt clip
- Three XX75® size 1816 high-strength 28" arrows
- Finger tab
- Polymer arm guard
- Fits right or left-handed archers
- Colors: Black and Pink

SCOUT 2™

- Durable fiberglass construction
- Over Nock – installed
- Sleeve Point – installed
- 26" or 28"

BEGINNER FINGER TAB

- For right handed archers

BEGINNER BOW

The Easton beginner bow is the perfect set up to get you started shooting archery. Smooth shooting polymer platform and easy-to-handle draw length-to-draw-weight ratio, the 52" bow is ideal for beginners seeking correct form development and accuracy.

- Ambidextrous for right or left-handed archers
- Integrated sight channel
- Custom Dacron™ string
- Ambidextrous arrow rest and sight pin included
- High-strength glass/polymer limbs and advanced polymer riser
- Ideal beginner draw weight range 10-20 pounds
- Max 26" draw
- Made in USA
- Includes: bow, quiver, three arrows, sight, finger protector, and armguard

Kit colors: Black, Pink, and Realtree® Xtra

TOOLS & SUPPLIES

QUICKBOND™ INSERT ADHESIVE

- Easy to identify orange color
- Impact resistant
- Ready to shoot in 15-30 minutes
- Sizes: 0.5 FL oz.
- HIT approved

QUICKBOND™ VANE ADHESIVE

- Ultimate strength
- Bonds in seconds
- Primer Pen compatible
- Sizes: 0.5 FL oz.

CONVENTIONAL BOWSTRING WAX

- Protects bowstring from wind and weather
- Specially formulated for modern bowstring materials

QUICKBOND™ VANE PRIMER PEN

- Compatible with all vane adhesives
- Improves bond strength & reduces drying time
- Improves adhesion for hard-to-stick vanes

FASTSET™ VANE GEL

- Sizes: 3 gram

FLETCH-TITE® PLATINUM

- Size: 22-gram tube

CROSSBOW RAIL LUBE

- Full synthetic formula provides maximum lubrication for crossbow rails
- Protects string from damage

HOT MELT ADHESIVE

- Low temperature
- 3" x 1/2" stick
- Available in 10" shop stick

3-STEP BOWSTRING MAINTENANCE KIT

- String Cleaner —removes dirt, wax and contaminants from bowstring
- Bowstring Revitalizer—restores color and penetrates to the core of the string for reduced friction and maximum shot life
- Full Synthetic Bowstring Wax—protects longer & better than conventional waxes

FULL-SYNTHETIC ARROW LUBE

- Full-synthetic formula for easy arrow extraction
- Scent free, easy to apply
- Suitable for all types of arrows
- Most advanced arrow lube ever created
- Quiver-mount neoprene sleeve included

WEDGE ARROW PULLER

- Proprietary compound for maximum arrow grip
- Internal-molded sides for improved wet-weather pulling
- Ergonomic wedge shape for comfortable fit

PUCK ARROW PULLER

- Proprietary high-grip compound for maximum arrow grip
- Flat puck design for maximum grip leverage
- Best for tight single spot groups

UNIVERSAL NOCK TOOL

- Handy design allows for installation and removal of all nock sizes
- Includes a threaded shank for easy removal of broken nocks

BROADHEAD WRENCH

- For safe installation and removal of broadheads from arrows

BCY NOCK & PEEP SERVING

- .020" nylon thread perfect for tying nock sets and peep-sights
- Includes 1m red thread and 1m black thread

BCY #24 D-LOOP ROPE

- The professionals' choice and #1 choice of archers worldwide
- Stiff-braided POLY fibers
- Good, consistent burn
- Available in 1m lengths and 50ft spools

Fletch-Tite® is a registered trademark of Bohning Company LTD

TOOLS & SUPPLIES

ELITE NOCK AND D-LOOP PLIERS

- Maximizes mechanical advantage for tightest possible D-loops
- Patented dual-jaw design
- Convenient and versatile archery tool
- Six tools in one

PRO ARCHERY NEEDLE-NOSE PLIERS

- A must have for any serious bow mechanic
- Rubber-coated handle
- Needle-nose plier design with archery specific features for D-loop stretching and hot-melt point installation

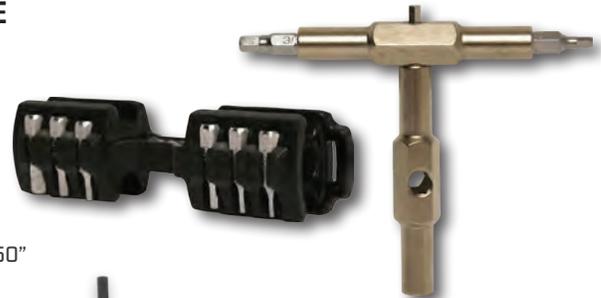

BCY™ POLYGRIP CENTER SERVING THREAD

- .020" polyester thread perfect for center serving
- 75-yard spool

ARCHERY OMNI TOOL BY FIX-IT STICKS® - 17 PIECE

- Integrates 17 of the most popular Standard & Metric Hex, and Star bit sizes into the most compact archery tool ever produced

1 Guaranteed straight to more stringent standards than ATA/ ASTM methods.
 2 Guaranteed to meet or exceed similar carbon-industry straightness specifications.

3 Grains-per-shafts in a dozen bundle.
 ®/™ Registered trademark/trademark of Easton.

LIMITED WARRANTY

The Easton arrow shaft limited warranty covers any defects in material and/or workmanship for one year from the original owner's date of purchase. Arrow shafts that are defective will be replaced by your local Easton dealer with proof of purchase. Damage caused by impact from other arrows, impact with hard objects, improper cleaning or fletching, or from normal wear and tear is not covered by Easton's limited warranty. The limited warranty also does not cover damage resulting from your failure to follow Easton's written instructions. For written instructions and warranty details see www.eastonhunting.com.

Some of the products on these pages are covered by one or more of these patents: 7,004,859 - 7,077,770 - 7,115,055 - 7,115,055

1 Length is approximate stock shaft length for each size.

2 NIBB point grain weights are ±0.5 grain. All other components are ±1 grain

! WARNING FOLLOW THESE INSTRUCTIONS TO AVOID PERSONAL INJURY. SEE WARNINGS AND USE AT WWW.BSAFE.WS OR 877-INFO-ETP (877-463-6387).

CHECK EVERY ARROW, EVERY SHOT

ARROW DAMAGE

Any arrow can be damaged, even when new. A damaged arrow could break upon release and injure you or a bystander. If you have any reason to believe that an arrow has been damaged, DISCARD THE ARROW. Damage to an arrow shaft, or any of its components, may occur from improper transport, handling, or use; impacts with hard objects or other arrows; or, after being shot into a game animal. No list can cover all possible conditions and situations that may cause damage. Use good judgment and common sense, as well as follow the warnings and instructions below, to determine if your arrow has been damaged in any way. **WARNING! NEVER SHOOT A DAMAGED ARROW.**

ARROW USE PRECAUTIONS

Before each shot (including the first shot of a new arrow) carefully inspect each arrow shaft and all arrow components to see that they have not been damaged. Place the arrow between your thumb and fingers, and using your other hand to slowly rotate the shaft, run your fingertips along the entire arrow length, feeling and looking closely for nicks, cracks, splits, dents, or other marks that could indicate the shaft has been damaged (see arrow inspection information at www.eastonarchery.com/warning-use/). If your arrow is crested, inspect for damage on the crest surface and for any soft spots under the crest wrap. You may need to remove the cresting to make a thorough inspection. If damage is present, DISCARD THE ARROW.

WARNING! NEVER SHOOT A DAMAGED ARROW.

A loose or damaged nock may indicate a damaged arrow shaft or otherwise be dangerous. Before each shot, inspect the nock for damage and check that it is fully seated, and fits tightly in the shaft. Apply twisting pressure to see if the nock turns easily. If the nock has backed out of the arrow or turns easily, inspect for cracks in the arrow shaft. If there are cracks in the arrow shaft, or if the nock is loose or is damaged, DISCARD THE ARROW.

WARNING! NEVER SHOOT AN ARROW WITH A LOOSE OR DAMAGED NOCK.

BOW INSPECTION

Before shooting any arrow, it is critical to inspect your bow, including all components, to be sure that it is properly adjusted and in good working order. Arrows should only be used with bows that have a correct pull weight and draw length (see arrow selection chart at www.eastonarchery.com/shaft-selector/). Selecting the correct arrow and arrow length for the bow is the responsibility of the shooter, and failure to do so could result in personal injury and/or equipment damage. **WARNING! NEVER SHOOT AN ARROW WITH AN IMPROPERLY ADJUSTED OR DAMAGED BOW.**

ADDITIONAL TESTS FOR CARBON ARROWS

When checking carbon arrows, perform the following additional tests:

1. Grasp the shaft just above the point and below the nock, then flex the arrow in an arc (bending it away from you and others) with a deflection of 1 to 2 inches (2.5 to 5 cm), and feel, look and listen for cracking (Figure 1). Perform this test 4 to 6 times, rotating the arrow slightly between each flex until you have gone around the entire arrow. If you hear or feel cracking, the carbon has been damaged, DISCARD THE ARROW. **WARNING! NEVER SHOOT A DAMAGED ARROW.**

2. While still holding the point and fletching ends of the arrow, twist the shaft in opposite directions (Figure 2). If the arrow "relaxes" or twists easily, the carbon has been damaged. DISCARD THE ARROW. **WARNING! NEVER SHOOT A DAMAGED ARROW.** A damaged arrow could break upon release and injure you or a bystander. If you have any reason to believe that an arrow has been damaged, DISCARD THE ARROW. **WARNING! NEVER SHOOT A DAMAGED ARROW.**

CARBON ARROW CUTTING

Only cut a carbon arrow using a high-speed arrow cut-off saw. Using any other saw or cutting device may cause damage to the arrow. If an arrow has been cut without using a high-speed arrow cut-off saw, DISCARD THE ARROW. **WARNING! NEVER SHOOT A DAMAGED ARROW.**

SOLVENTS

CAUTION: When removing fletchings, or for any other reason, do not soak any carbon arrow shaft in solvents. This can weaken the resin that bonds the carbon fibers. (For directions on arrow set up, refer to the the Easton Tuning Guide.)

WARNING! NEVER SHOOT A DAMAGED ARROW.

To reduce your risk of serious injury or death, you must read and understand all safety warnings and instructions. If you do not understand these instructions, or cannot adequately perform the above tests, STOP and seek appropriate assistance before shooting any arrow.

! WARNING: Cancer and Reproductive Harm — www.P65Warnings.ca.gov

Some of the products listed in this Product Guide may be subject to California Proposition 65 warnings requirements. See product packaging or website for specific warning information. This Product Guide is intended for informational purposes only, not a solicitation for product sales.

Thirty medals. One arrow.

Once again Easton is used to win every archery medal at the Summer Games.

BOWHUNTING SINCE 1922
